### A NOTE REGARDING GRADING

I have long admired the excellent book written by Dr. William H. Sheldon on Early American Cents. One of the excellent features involved a scale for grading of condition from 1 to 70. 70 is perfection, 65 Mint State, 60 Mint State. (yes, one uncirculated coin can certainly be more attractive than another). About Uncirculated is 55 or 50, etc. One cannot but agree that when a coin is described as Very Fine 20 and another as Very Fine 30 the comparative picture is better than if both were merely described as "Very Fine." This then is the scale.

Uncirculated-	MS 70, MS 65, MS 60
About Uncirculated -	AU 55, AU 50
Extremely Fine -	F 40
Very Fine -	VF 30, VF 20
Fine -	F 15

I hope you approve and that other cataloguers will follow suit.

## LARGE CENTS

The Early Large Cents, 1793-1814 are attributed according to the standard work by Dr. Wm. H. Sheldon "Penny Whimsey", a book we highly recommend as one of the best numismatic texts ever published. It is Dr. Sheldon's scale of 1 to 70 which he introduced for this series, which we have tried to apply to the other United States Coins. It works beautifully for one series, it should for the others as well.

## LARGE CENTS 1816-1857

- 232—An interesting collection of the Late Date Large Cents from 1816 to 1857, containing not only a coin of each date but also many major die varieties. 1817, for example, has a wide date as well as a 15 star variety; 1819 has 3 pieces, the 1819 over 8 overdate, a small date and a large date; 1820 has the 20 over 19, a small date and a large date; the 1821 wide and narrow date varieties are also included and the same is true of 1822. Especially noteworthy is the 1823 over 22 in Fine condition. The perfect 1823 has a V. Good obverse, Fine reverse; there are 3 1824s including the 24 over 2 and 2 each of 1826, 1828, 1832, 1834, and 1835 includes the 1835 large date, large stars, a

VF-30 coin. An AU-50 1836 is also a most attractive coin.

There are three 1837s and 5 1839s, among the latter, the rare 39 over 6 Very Good to Fine, the types of 1838 and 1840, the Booby and Silly heads. The 3 1843s include the type of 1842, the obverse 42-reverse 44, and the type of 1844. A pair of 1844s includes the 44 over 81 F/VF, the small, medium and tall 1846s, the 1851 over 81 as well as the normal date, the slanting and upright 5 varieties of 1855 and 1856 and, finally, the large date 1857 completes the collection.

The condition varies - from Good for a very few to AU for the 1836. If we were to try to average out, Fine would probably be accurate, perhaps on the conservative side just a bit.

As a guide to interested collectors, we estimate the value of the set at \$1500.00

EXTREMELY RARE 1876-CC

813

- 813—1876-CC. The intent was to re-melt all of the coins of this issue, a few escaped. Estimates of the number of pieces known vary. Based on our experiences we would place the number at "less than ten." This

specimen is not the finest of the group, not having been handled as carefully as was its due. A notation accompanying the coin states that it is ex-Stoddard and Col. Green. Recalling that the Stoddard coins, sold at auction, were all cleaned in a similar fashion, very likely this coin did come out of that collection. A choice specimen would probably fetch in excess of \$12,500.00 today. This example, and after all we must consider that the available items are very, very few, should bring \$8,500.00

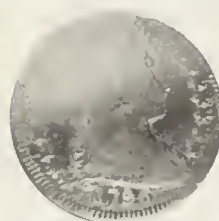

- 814—1877 Proof, 510 minted. \$700.00

- 815—1878 Proof, hairlines, 600 minted. \$585.00

## HALF DOLLARS

### Philadelphia Mint

Minted 1794 to date

(Half Dollars with B reference numbers are attributed according to BEISTLE "Register of Half Dollar Die Varieties", that standard work on the series. A new book, by Al Overton, has been published since this collection was cataloged. It is recommended)

- 1091—1794 B3aA. Close date, a die crack across the top of Liberty's head from the edge between L and I and out to the edge through the 10th star. Fine. An extremely rare variety. \$800.00

- 1092—1795 B4H. Double cut date, BE in LIBERTY are recut./3 leaves under each wing, the only such reverse die of this date. A large crack from eagle's neck, across left wing, to the edge at left of first S in STATES. Barely circulated and extremely rare both because of the variety and because of the condition of this particular coin. Undoubtedly one of the finest known examples. Should exceed \$2400.00

- 1093—1795 B9N. Low date, a small elongated die defect above last star to end of bust./2 stars below each wing. Fine, very rare. \$525.00

- 1094—1796 B2aA. Fifteen obverse stars; die crack from edge to bust, emerging and joining last 3 stars. Very Fine and very rare. \$4600.00

- 1095—1797 B1aB. A die crack from the edge through the center of the 2nd star to the curls. A planchet break at the edge between the last 2 stars. The date is especially sharp. A splendid coin, not quite Extremely Fine although it was acquired as such. Should fetch a handsome price. \$5000.00

- 1096—1801 B1B. Very Good, scarce. \$150.00  
 1097—1802 B1A. About Fine, scarce. \$190.00  
 1098—1803 B1aA. Small 3. There is a small die crack from edge through T in LIBERTY to head. Very Fine 25. Scarce. \$220.00  
 1099—1803 B2bB. Large 3.12 arrows in claw. Almost Very Fine, scarce. \$150.00  
 1100—1805 over 4. B1A. Close date, the 1 and first star touch the curls/4-1/2 berries on the olive branch. Beistle states that the beak does not touch the star point. He may have been examining a superior specimen. Ours appears to touch. About Fine. \$160.00

- 1101—1805 B5F. Close date, set high, akcidefect lines join tops of dates (Beistle coined the word meaning accidental die defect). In the markings above and the bust one may discern an incused star as in sub-variety 5c but the incused STATES below the date is not apparent. About Very Fine. \$100.00

- 1102—1806 B1cAb. Pointed 6, irregular die crack below the date, akcidefect lines surround date/the laurel stem does not extend through the eagle's claw; akcidefect lines above clouds and between STATE OF. Barely circulated, a lovely coin. \$290.00

## HALF DOLLARS (Cont.)

- 1103—1806 B2B. The pointed 6 over an inverted 6, the first cut 6 having been inverted in error and then re-cut. Unlike Beistle's description, this coin does not have section of milling above E and part of T in STATES broken out. Very Fine 20. Very rare. \$300.00
- 1104—1806 B7F. Pointed 6, stem extends through claw; double cut TY. Die cracks join all stars on left and are above LIBER/die crack above UNITED STATES. Fine, scarce. \$75.00

- 1119—1812 Very Good \$12.50

1454—1799 B9 "Apostrophe" after last S in STATES. Apparently an early strike without the flaws in the field and without the die cracks which usually accompany this die variety. Very Fine 25. \$200.00

1455—1799 B12b. The so-called "no-berry reverse". Actually there is a very light small stem with a tiny berry on the middle upper side of the branch. Several heavy die breaks from the shattered die. Rare. Very Fine 30. \$275.00

1460—1801 (B1a) Bolender lists only B1 as having a point of a star "almost" touching the lower part of the eagle's beak. On the other listed varieties, the point of the star touches the upper part of the beak. On this coin, the star touches the lower part of the beak. These are suction marks around the date and suction marks on reverse. Several die cracks on reverse. Extremely Fine 40. \$300.00

Liberty has closed lips, not true of any other overdate die. Bolender discovered this variety after the plates for his book had been completed and that was the only specimen known to him. Extremely rare, Fine. \$400.00

- 1700—1859 A flaky planchet evident at neck, before head band, above ATE in STATES and O in OF as well as below O; The O in DOLLAR is filled in. No evidence of wear. Uncirculated 60. Rare, 4952 minted. \$600.00

1701

- 1701—1860 The second rarest of the Dahlonega Mint Gold Dollars. The characteristically weak left side and the die line from the nose towards the rim above N affects the UN in UNITED as well as the reeding on the reverse, which has a strong right side and strong lettering throughout. **THE EXTREMELY RARE 1841 \$2.50 GOLD**

1731

1731—This is the specimen from the famous Wolfson Collection (Lot. No. 114). One of the great rarities of the United States Gold Series, the 1841 Quarter Eagle has appeared at auction perhaps six times in almost 60 years. This specimen is a proof with some hairlines on both obverse and reverse. The edge is finely milled, a characteristic of the Philadelphia Mint coinage and unlike the coarse milling of the Dahlonega and Charlotte Mint issues. It is our opinion that perhaps only 6 specimens of this rarity exist today. Certainly a much rarer coin than the 1804 Silver Dollar which would fetch at least \$40,000.00 if sold today. The "Little Princess" (a nickname applied to the 1841 Quarter Eagle) should bring in excess of \$25,000.00

1732—1842 Very Fine 20, very rare. Only 2823 were originally minted and only a few survived. \$300.00

1733—1843 Very Fine 25. \$65.00

1736—1846 Very Fine 25. Scarce. \$65.00

1737—1847 About Uncirculated 55. Small scratch on cheek. Scarce. \$80.00

## U. S. QUARTER EAGLES (Cont.)

1738

1738—1848 CAL on reverse. This tremendously interesting coin is frequently sought by collectors of Territorial Gold Coins because it was made from some of the first gold discovered in California. The CAL on the reverse distinguishes this coin from the regular issue. 1389 pieces were minted and perhaps a couple of dozen survived. This specimen may not have been in circulation but it shows some signs of handling. Retaining some original lustre, it would grace any collection. \$5000.00

1753

1753—1863 Brilliant Proof. Only 30 coins minted for this year. This is a sharp, brilliant specimen. There is a hint of a tiny edge nick mentioned only because of the rarity of this coin. \$5000.00

## PAPER MONEY

Attributions are to Friedberg, "Paper Money of the United States"

The first United States Paper Money was issued in 1861. These were Demand Notes and were released in 5, 10 and 20 Dollar denominations. This series is the only one that bears neither the Treasury Seal nor the names of the Treasurer and Register of the Treasury. The serial number was imprinted only once. Only a few Demand Notes have survived. The term "greenback" owes its origin to this series.

## FRACTIONAL CURRENCY

Attributed according to Friedberg (F) and Rothert (R)  
This, one of the most interesting facets of the history of United  
States money was, in a real sense, necessity money. During the  
early years of the Civil War, banks suspended specie payments  
thus putting a premium on all coins. The result was that all  
coins were being hoarded and soon disappeared from circulation.  
Obviously it became impossible for merchants to function.  
General Spinner, Treasurer of the United States, recommended  
an issue of 5, 10, 25 and 50 cent notes and Congress authorized  
it by an Act of July 17, 1862. Later a 3 cents note was authorized,  
by act of March 3, 1863. The earliest notes were called POSTAGE  
CURRENCY, bearing facsimiles of the then current 5 and 10  
cents postage stamps. The later issues were called Fractional  
Currency.  
All of these notes were to be redeemed in actual silver coins  
by the Acts of January 14, 1875 and April 17, 1876. It is esti-  
mated that less than 2 million dollars is still outstanding.
